CAREER OBJECTIVE

Associate Software Engineer at Cogniwide Technologies who ships GenAI products,full stack applications and quality-engineered releases. Designed and built an AI interview platform that automates hiring end to end, from scheduling through online assessment to AI-driven candidate evaluation. Delivered client solutions in AI chatbot management and data analytics,and owned functional and performance testing with ApacheJMeter.

EXPERIENCE

Cogniwide Technologies Privated Limited
Associate Software Engineer JUL 2026 - PRESENT

- Designed and built an AI-powered interview platform on the CogniAssist AI Platform, automating the full hiring lifecycle: scheduling, online assessments and AI-driven candidate evaluation.
- Integrated LLM-based evaluation to score and summarize candidate responses,reducing manual screening effort for recruiters.
- Deployed and managed AI models and services on AWS and Azure, supporting reliable production use.
- Delivered AI chatbot solutions for enterprise customers, owning configuration,maintenance and performance
- Built data models and analytics dashboards for customer projects, turning raw business data into decision-ready insights.
- Owned end-to-end testing for a customer project, designing functional test cases and running load and performance tests in Apache JMeter to validate stability before release.

Software Engineer Intern JAN 2026 - MAY 2026

- **CogniRPA** - Developed a drag-and-drop visual builder in React Flow that lets users create Robot Framework test automation flows without writing scripts.
- **AISC** - Engineered layered analytics tables from raw school data, powering dashboard visualizations for reporting.
- **Nesto sAP** - Built a proof of concept automating price updates in the SAP desktop application with the RPA Framework.

PROJECTS

Smart Resume Parser NLP · Machine Learning

- Built an NLP pipeline that extracts key candidate details from resumes and an ML classifier that shortlists them as Selected or Not Selected.

Chain Snatching Detection Deep Learning · Vision Transformer

- Developed a ViT-based model that automatically detects chain snatching incidents in surveillance footage.

EDUCATION

Mepco Schlenk Engineering College
B.TECH - Artificial Intelligence and DataScience - 2026
CGPA : 7.43

T.N.P.M.M.Ammayapa Nadar Girl's HR SEC SCHOOL
HSC - 2022 Percentage - 88.1
SSLC - 2020 Percentage - 82.8

SKILLS

GENERATIVE AI
• LLM Integration
• Prompt Engineering
• AI chatbots
• AI Evaluation

FULL STACK
• HTML • CSS • Javascript • React
• React Flow

DATABASES
• MYSQL • MONGODB • NEO4J

TESTING & AUTOMATION
• E2E Testing
• Functional non-functional
• Apache JMeter
• RPA

CLOUD & DEPLOYMENT
• Amazon Bedrock
• Amazon ECS
• Amazon S3
• Azure AI Foundry
• Azure Container Apps
• Azure Blob Storage

DATA & ML
•Framework - PYTORCH
•Framework - KERAS
•Power BI
•ALGORITHMS - Regression, Classification, Clustering

COURSEWORK

•Microsoft Power BI Certification – 2025
•Web development certification - INFOSYS 2024
